Results-driven Financial and Data Analyst with experience in financial analysis, data interpretation, and customer-focused business solutions. Skilled in Excel, SQL, and Power BI for data cleaning, visualization, and performance analysis. Adept at evaluating financial and operational data to identify trends, improve service delivery, and support strategic decision-making. Combines strong analytical thinking with customer service expertise to deliver data-driven insights that enhance business performance and client satisfaction.

WORK EXPERIENCE

SUPERSTORE SALES PERFORMANCE ANALYSIS (EXCEL DASHBOARD PROJECT)

2026

GitHub Repository; https://github.com/HassanRidwan/Superstore_sales_analysis_excel

- Built an interactive Excel dashboard using Pivot tables, charts, and slicers to analyze sales performance across regions, segments, and product categories.
- Calculated key business KPIs including Revenue, Profit, Orders, Average Discount, and Profit.
- Identified that high discount levels drive losses while low discounts generate the majority of profit, highlighting inefficiencies in pricing strategy
- Analyzed customer, product, and regional performance to uncover trends and support data-driven decision-making.

FINANCIAL ANALYST VIRTUAL EXPERIENCE

2025

New York Jobs CEO Council

Forage.

- Analyzed financial statements and operational data for a technology-focused investment banking case study.
- Evaluated the financial impact of a proposed strategic partnership, focusing on revenue drivers, cost structure, and potential profitability.
- Conducted basic financial modeling and scenario analysis to assess feasibility and strategic value.
- Prepared and delivered a structured presentation summarizing key financial insights, risks, and recommendations.

DATA ANALYTICS VIRTUAL EXPERIENCE

2025

Deloitte Australia

Forage.

- Cleaned and analyzed large datasets using Excel (Pivot Tables, VLOOKUP, Conditional Formatting) to ensure data accuracy and usability.
- Developed Interactive dashboards and Visual reports to highlight financial and operational performance trends.
- Built visual dashboards showing financial and operational trends.
- Identified performance gaps and developed data-backed insights to guide decisions.
- Identified performance gaps and key business drivers, translating data findings into actionable insights.
- Presented analytical outcome and recommendations to support data driven decision making.
